

# PS28 - Repolish Stone - Small Areas

Repolish Small Areas (Single Tiles, Table Tops, Bar Tops, Tables etc) or Lightly Etched or Scratched Calcium Based Stone - Marble, Limestone, Travertine etc

**PRODUCT: RESHINE**

**EQUIPMENT:**

- AquaBug Cleaning Kit;
  - Scrub pad or brush;
  - Pure soft cotton or terry towel cloth,
  - Spray bottle with clean water,
  - Absorbent paper or towels;
- **NOTE:** Variable speed hand held buffer & a soft bonnet for larger areas or quicker results

**PRECAUTIONS:**

1. Read entire label, SDS & technical bulletin before using;
2. Wear appropriate gloves, skin & eye protection;
3. Use when surface temperature is between 4°C & 32°C;
4. Do **NOT** allow product to come in contact with any non-recommended surfaces;
5. Surface must be clean, dry and free from any existing coating sealers or other coatings;

**PROCEDURE:**

1. SHAKE WELL BEFORE USING;
2. Apply a small amount of **Re-Shine™** (1-2 tablespoons) directly to etched or scratched area;
3. Mist a small amount of water onto **Re-Shine™**
4. Buff with soft cotton or terry towel until cream becomes clear and nearly dries;
5. **DO NOT ALLOW TO DRY ON SURFACE**
6. Re-wet surface with plenty of water to flush;
7. Polish completely dry with clean towels;
8. Repeat the process as necessary;
9. For larger areas or quicker results, you may use a variable speed hand held buffer with a soft bonnet or a white polishing pad.

**NOTE:** Surface should then be sealed with an appropriate **Aqua-Seal STS™ Sealer** to provide stain resistance and ease ongoing maintenance - refer to our website [www.aqua-seal.com.au](http://www.aqua-seal.com.au);

**Step-by-Step Remove Etch Marks** - Read entire label before using

**Step 1** Acid based contaminants will etch, eg: wine etch on calcium based stone.

**Step 2** Apply a small amount of product directly to etch.

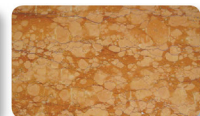

**Step 3** Add water & buff with soft cotton or terry towel until slurry nearly dries.

**Step 4** Re-wet with plenty of water.

**Step 5** Polish dry completely with absorbent towels.

**Step 6** Shine restored.

**SAFETY**

**CORROSIVE - CONTAINS POTASSIUM OXALATE**

**DIRECTIONS:** Wear protective gloves, eye & skin protection when using.

**Note A:** Severely scratched, damaged or worn polished stone may require professional restoration by diamond grinding.

**Note B:** NOT suitable for some green and black marbles, granite, ceramic or porcelain tile;

**Note C:** For repolishing larger floor areas, use Aqua Seal **Polish Pro™** or Aqua Seal **5X Pro™**. See Aqua Seal **Problem Solver #21**.

**Note D:** Use Aqua-Seal **AquaGuard™** on tabletops, benchtops and other non-traffic areas to enhance the lustre of the polished finish.

This recommendation is intended as a general guideline. The actual procedure requirements, dilution ratios, dwell time etc may vary depending on type of surface, method of application and severity of the problem.

**READ PRODUCT LABEL INSTRUCTIONS, TECHNICAL BULLETIN & SDS THOROUGHLY BEFORE USING. ALWAYS TEST FIRST. KEEP SURFACE CLEAN AND DRY TO REDUCE THE POSSIBILITY OF SLIP & FALL ACCIDENTS AND INJURIES**
